(54) Title: METHOD FOR PRODUCING A RECOMBINANT PROTEIN USING POLLEN

[Note] Microscopic photograph of lily pollens on 0 hr(A), 8 hr(B), 16 hr(C) after culturing in pollen growth medium

(57) Abstract: The invention relates to method for producing a recombinant protein using pollen. More specifically, the invention relates to method for producing a recombinant protein by introducing a recombinant gene into pollen using *Agrobacterium tumefaciens* via vacuum infiltration and then inducing pollen tube growth, and it makes possible to scale-up recombinant protein within short period of time and low production costs.
